

## Mikhail Kolobov Resume

### Mikhail Kolobov

#### **Co-Founder / Technical Lead, BleedIO Tech Singapore**

#### **BleedIO Tech: 2024-present**

Mikhail Kolobov is a co-founder and technical lead at BleedIO Tech. He leads the engineering and technical delivery side of the company from Singapore, with responsibility spanning mesh-network architecture, software delivery, hardware prototyping, and the data systems that sit on top of BleedIO's locMESH and netMESH platform strategy.

At BleedIO, Mikhail focuses on the solution layer that makes the wireless platform commercially useful: data-collection pipelines, remote network management, monitoring dashboards, reporting systems, and the engineering workflows needed to support product deployment. He also drives the technical roadmap for AI-enabled analytics on network and sensor data and supports the company's IP development in mesh networking.

Mikhail also serves as founder and CEO of Prox SG Pte. Ltd., a Singapore-based electronics and IoT business he has operated since 2009. That background gives BleedIO access to experienced engineering capacity across hardware, firmware, software systems, and prototyping, and provides direct continuity between BleedIO's product vision and practical technical execution.

#### **Highlights**

- Leads technical architecture, implementation, and engineering execution for BleedIO
- Manages Singapore-based engineering resources across backend, frontend, data, and prototyping
- Deep background in electronics, IoT systems, and connected-device product delivery
- Supports BleedIO's mesh-network IP and AI analytics roadmap
